

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Blue Whale Growth Fund (the "Fund"), Class T USD Accumulation, a sub-fund of Blue Whale Investment Funds ICAV (the "ICAV") (ISIN: IE00BJM0B639)

The Fund is managed by Link Fund Manager Solutions (Ireland) Limited.

Objectives and Investment Policy

Objective

The objective of the Fund is to seek capital growth.

Investment Policy

To invest in equity and equity related securities from a broad range of locations and sectors, both in developed and emerging markets. The Fund will have a concentrated portfolio, generally comprising 25 – 35 listed stocks, principally in equities, based on detailed research by the Investment Manager.

Essential features of the Fund

- The Fund is actively managed without reference to a benchmark index. The Fund's performance will be compared against the IA Global Sector. The IA Global Sector is a group of UK funds in the same sector grouped together by the UK Investment Association (the trade body that represents UK investment managers).
- The Fund can invest in any market or geographic sector with no particular sector or style bias. Aggregate investment in emerging markets shall not exceed 20% of NAV.
- You can buy and sell shares in the Fund every Business day.
- Income from the Fund will be added to the value of your investment.
- The Fund may invest in other open-ended collective investment schemes, to a maximum of 10% of the Fund's overall NAV.
- The Fund may invest in money market funds or instruments for liquidity or defensive purposes.
- Currency hedging arrangements may be used to reduce the risk of currency movements in the value of securities held by the Fund which are not denominated in US Dollar.
- The Fund can take exposure of up to 100% of its NAV through use of financial derivative instruments (FDI).
- Investment by the Fund in Russia shall not exceed 10% of the Fund's NAV.
- The base currency of the Fund is US Dollars.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past and therefore how much a fund's returns have varied. It is a measure of the fund's volatility. The higher a fund's past volatility, the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The Fund has been classed as 6 because its volatility has been measured as above average to high.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Equity Market Risk: As the Fund's portfolio is concentrated and consists principally of equities, it will likely exhibit greater volatility than other asset classes.
- Currency Risk: As the Fund invests in global securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Concentration Risk: The Fund intentionally holds a small number of investments and is not restricted by reference to any geographical region, sector or benchmark. This concentration means that the performance of a single stock within the portfolio could have a greater effect on the Fund's share price. This can result in larger swings (both up and down) in the Fund's value.
- For full details of the Fund's risks, please see the Prospectus and Supplement, which may be obtained from the address in 'Practical Information' below.

Charges for this fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
