BLUE WHALE GROWTH FUND

INTRODUCTION

The ICAV is authorised in Ireland by the Central Bank as a UCITS for the purposes of the UCITS Regulations.

This Supplement forms part of the Prospectus and should be read in conjunction with the general description of the ICAV contained in the Prospectus together with the most recent annual and semi-annual reports.

Details of the available classes of Shares in the Fund are set out in Appendix 1 to this Supplement. All Share Classes in the Fund are Accumulating Shares.

As at the date of this Supplement, there are no other Share Classes in the Fund, apart from those listed in Appendix 1, but additional Share Classes may be added in the future in accordance with the UCITS Requirements.

The Base Currency of the Fund is the US Dollar. Share Classes denominated in a currency different to the Base Currency will not be hedged against movements in the Base Currency.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The investment objective of the Fund is to seek capital growth.

Investment Policy

The Fund pursues an actively-managed investment strategy and is not managed in reference to a benchmark. The Investment Manager will seek to achieve the Fund's investment objective primarily through investment in equity and equity related securities (namely, common and preferred stock and depository receipts, both ADRs and GDRs) of companies located throughout the world, both in developed and emerging markets.

The Fund's aggregate investment in emerging markets shall not exceed 20% of the Fund's Net Asset Value at any time.

The securities in which the Fund will invest shall, subject to the Regulations, be listed and/or traded on the Regulated Markets set out in Schedule 1 of the Prospectus.

In selecting investments for the Fund's portfolio, the Investment Manager will identify companies which, based on its fundamental research it considers meet the following criteria:

- have the ability to grow and improve profitability over the long term;
- have a current valuation that is attractive relative to their future growth and profitability;

The Investment Manager will select companies from a broad range of geographies and sectors with no particular sector or style bias.

The Investment Manager will conduct detailed fundamental research on companies. Fundamental research is generally conducted through:

- examining a company's financial statements to assess the company's management (i.e. the calibre and effectiveness of the company's management team);
- assessing a company's competitive landscape (i.e. the environment in which the business operates relative to its competitors), and
- assessing a company's growth prospects (i.e. the company's potential for growth and generation of profits) by examining the company's revenues and earnings.

As the Fund's portfolio will be concentrated, generally comprising between 25 to 35 stocks consisting principally of equities, it is likely that the Fund's Net Asset Value will exhibit greater volatility than other asset classes.

In addition to direct investment in equities, the Fund may also invest in the units or shares of open ended collective investment schemes including exchange traded funds which provide equity exposure consistent with the investment policy of the Fund. Aggregate investment by the Fund in open ended collective schemes shall not exceed 10% of the Fund's Net Asset Value at any time.

Subject to the conditions and within the limits laid down by the Central Bank, the Fund may also invest in financial derivative instruments ("FDI") for efficient portfolio management purposes. In this regard, the Fund may invest in index futures (where the underlying index is one of the following: S&P 500 Index, Nasdaq 100 Index, EURO STOXX 50 Index, FTSE 100 Index, DAX Index, CAC 40 Index, IBEX 35 Index, FTSE MIB Index, Nikkei 225 Index, Hang Seng Index) which may be used to provide exposure consistent with the Fund's investment policy more efficiently from a cost and timing perspective, without having to invest directly in the reference assets. The Fund may also occasionally acquire warrants and rights. Typically, however, warrants and rights will only be acquired passively as a result, for example, of corporate actions and it is not the intention of the Fund to actively trade in warrants or rights. The Fund may also invest in FDI, namely currency forward exchange contracts, in order to provide protection against exposure to currency risk arising at the level of the Fund's portfolio (as described further in the section headed "Currency Risk – Fund Level" of the Prospectus).

The Fund will only invest in FDI in accordance with the ICAV's risk management process as prepared and submitted to the Central Bank in accordance with the Central Bank's requirements. Investment in FDI will be in accordance with Schedule 2 of the Prospectus. Should the Investment Manager enter into FDI transactions on behalf of the Fund, the Fund's global exposure, being the incremental exposure and leverage generated by the Fund through its use of FDI, including instruments which embed a derivative element, will be calculated on at least a daily basis using the commitment approach. The Fund may be leveraged up to 100% of its Net Asset Value as a result of its use of FDI.

The Fund may also invest, for liquidity or defensive purposes in money market funds or directly in money market instruments including certificates of deposit, commercial paper and fixed and floating investment grade government and corporate bonds listed or traded on Regulated Markets.

Investment by the Fund in any securities listed or traded in Russia shall not exceed 10% of the Fund's Net Asset Value at any time and shall be limited to securities that are listed or traded on the Moscow Exchange.

The performance of the Fund will be compared against the "IA Global Sector". The IA Global Sector is a group of funds (including funds domiciled in the UK, Luxembourg and Ireland) within the same sector (i.e. funds with exposure to global equities and which invest at least 80% of their assets globally in equities) grouped together and published by the UK Investment Association (the trade body that represents UK investment managers). The Investment Manager will publish the performance of the Fund against the IA Global Sector average, being the average performance of all funds included in the IA Global Sector, in the Fund's marketing materials. This will enable investors to evaluate the Fund's performance against the performance of a peer group of other funds investing in similar assets. For

more information on the IA Global Sector, please visit: <https://www.theia.org/industrydata/fund-sectors/definitions>. Details of the funds listed in the IA Global Sector can be found at <https://www.trustnet.com/fund/sectors/focus?universe=O§or=O%253AFEEXJAP>

ESG Factors/Sustainable Finance

In line with the Fund's investment policy, the Investment Manager will integrate within its fundamental research and due diligence process, those factors related to sustainability risks involving environmental, social or governance factors which have a material impact on the ability of a company to grow sustainably and profitably. Sustainability risks (being an ESG event or condition that, if it occurs, could cause an actual or a potential negative impact on the value of an investment) will be identified, monitored and managed by the Investment Manager in the following manner:

1. In selecting investments for the Fund's portfolio, the Investment Manager will identify areas of material negative sustainability risk including, but not limited to, inadequate governance at corporate or country levels; unsustainable use of resources and raw materials; poor or exploitative labour conditions. These risks, if sufficiently material to the growth and sustainability of a company's future cashflows, may preclude an investment being made in that company's securities. The Investment Manager will also identify areas of material positive sustainability risk including, but not limited to, good corporate governance, financial inclusion, improvements in resource and raw material utilisation. These risks, if sufficiently material to the growth and sustainability of a company's future cashflows, may contribute to a positive investment decision.
2. During the life of the investment, sustainability risk is monitored through review of a company's business model and financial disclosures on a regular basis. Where sustainability risks associated with a particular investment are deemed to have increased to a level that threatens the investment thesis, the Investment Manager will consider selling or reducing the Fund's exposure to the relevant investment, taking into account the best interests of the Shareholders of the Fund.

The Investment Manager has determined that the sustainability risk (being the risk that the value of the Fund could be materially negatively impacted by an ESG event) faced by the Fund is low.

Investment and Borrowing Restrictions

The Fund is subject to the investment and borrowing restrictions as set out in Schedule 2 of the Prospectus and as provided for in the UCITS Requirements.

The Investment Manager may also arrange for temporary borrowings to provide liquidity in connection with redemption payments or purchases of securities, due to mismatches between the settlement periods of the Fund and investments held by the Fund, provided that the amount borrowed in this respect does not at any time exceed 10% of the Net Asset Value of the Fund.

Profile of a Typical Investor

A typical investor in the Fund may be an investor with a medium to long term time horizon (5 years and more) seeking to achieve capital appreciation principally in listed equities on a global basis.

Management and Administration

Detailed descriptions of the Directors and service providers to the ICAV are set out in the Prospectus.

RISK FACTORS

Investors' attention is drawn to the risk factors set out in the Prospectus and to the following additional risk factors.

Exchange Rate Risk

The Base Currency of the Fund is US Dollar. Shares denominated in a currency different to the Base Currency of the Fund will not be hedged against the Base Currency of the Fund and will, accordingly be subject to exchange rate risk in relation to the Base Currency of the Fund.

However, where payments in respect of the purchase or redemption of Shares are tendered or requested in a currency other than the currency denomination of the relevant Share class, any necessary foreign exchange transactions will be arranged by the Administrator for the account of and at the risk and expense of the relevant investor:

- (a) in the case of subscriptions, at the time cleared funds are received; and
- (b) in the case of redemptions, at the time the request for redemptions is received and accepted.

The exchange rate applicable to all such transactions shall be the prevailing exchange rate quoted by the Administrator's bankers.

TAXATION

Any change in the Fund's tax status or in taxation legislation could affect the value of the investments held by the Fund and could affect the return to investors. Potential investors and Shareholders should note that the statements on taxation, which are set out herein are based on advice which has been received by the Directors regarding the law and practice in force in the relevant jurisdiction as at the date of the Prospectus. As is the case with any investment, there can be no guarantee that the tax position or proposed tax position prevailing at the time an investment is made in the Fund will endure indefinitely. The attention of potential investors is drawn to the tax risk associated with investing in the Fund. See section headed "Taxation of the ICAV" in the Prospectus.

As set out in the Prospectus, the Directors also reserve the right to the compulsory redemption of all Shares held by a Shareholder if the aggregate Net Asset Value of the Shares held by the Shareholder is less than the Minimum Holding specified in this Supplement.
