

## Adobe

**Company:** Adobe  
**Sector:** Media & Entertainment  
**Initial Investment:** Sep-17  
**Company Size:** £240bn

### Supplying the best creative software, benefitting from the world's shift to digital content

Adobe has more than 50% of the digital content creation software market. Whenever you view an image, video, website, magazine, or even an app, there is a good chance it was created using its software. We believe Adobe will be a major beneficiary of continued explosive growth in this market, as ever-richer digital content is consumed across devices. Meanwhile, Adobe's pioneering transition to a subscription model is unlocking international growth opportunities and helping to combat software piracy.

## Alphabet

**Company:** Alphabet  
**Sector:** Media & Entertainment  
**Initial Investment:** Sep-17  
**Company Size:** £1,423bn

### There's more in store for the world's most ubiquitous search engine, map, and email service

The first internet company whose name turned into a verb, Google has become synonymous with finding answers online. Branching out into maps and email, the company now provides services that are so embedded in our lives that we can't imagine life without it.

Capitalising on its near-monopoly in online search, the company is reinvesting its profits from digital advertising into the platforms of the future - including driverless cars and augmented reality - which we see fuelling its journey to a multi-trillion dollar company.

## ASML

**Company:** ASML  
**Sector:** Technology  
**Initial Investment:** May-21  
**Company Size:** £247bn

### Enjoys a near-monopoly on the tools required to make semiconductors for smart devices

ASML is the dominant manufacturer of machines used to make semiconductors that put the "smart" in "smart devices". These semiconductor chips are currently used to power iPhones and datacentres but will go on to define the next stage of technological innovation from self-driving cars to augmented reality devices and super-connected cities.

Only ASML has overcome the extraordinarily complex engineering challenge required to manufacture machines that make leading edge chips, making it exceptionally well-positioned to benefit disproportionately from the almost 25% expected yearly growth in demand for smart and connected devices going into the next decade.

## ATLISSIAN

**Company:** Atlassian  
**Sector:** Technology  
**Initial Investment:** Dec-20  
**Company Size:** £71bn

### Helping businesses plan, execute and accelerate the development of apps of the future

Atlassian owns the de-facto collaboration tools used in developing the world's most popular apps and software. Its flagship products, Jira and Confluence, enable software developers to communicate, share and plan new products and updates in a seamlessly efficient way with non-technical parts of the business, accelerating the pace of overall product improvement and new launches.

We are excited about Atlassian's ability to extend its presence beyond tech companies as more businesses embark on the journey of digital transformation. Furthermore, by using its own products, the company has accelerated the creation of new tools for its die-hard userbase of developers. We are optimistic about these products contributing meaningfully to the company's value over the long term.

## Intuit

**Company:** Intuit  
**Sector:** Financial Services  
**Initial Investment:** Feb-18  
**Company Size:** £139bn

### Leading accounting software helping millions of small businesses stay on top of their finances

Intuit is the company behind both QuickBooks, the leading accounting software for small businesses globally and TurboTax, the leading tax-filing software for individuals in the US. This niche focus and an excellent management team that embraces 'self-disruption' have helped Intuit to thrive across various technology eras (DOS, Windows, Web and Mobile) since its founding in the 1980s.

While accounting and tax may sound 'boring', Intuit enjoys myriad growth opportunities. The majority of small businesses still don't use any accounting software and the majority of US citizens still pay professionals to help file their taxes. Technology is helping to change both. For example, QuickBooks Online, the web and mobile based version, allows receipts and invoices to be captured in seconds using a smartphone camera and automatically matched to bank statements. QuickBooks Online has grown its subscribers from 700k to 3.4m in just 3 years - impressive, yet still only a fraction of the hundreds of millions of small businesses globally that Intuit targets.

#### Marketing Communication

This Marketing Communication is issued by Blue Whale Capital LLP ("Blue Whale") which is authorised and regulated by the UK Financial Conduct Authority. Please refer to the Prospectus and KIID before making any investment decisions: [www.bluewhale.co.uk/global/eu](http://www.bluewhale.co.uk/global/eu)

Past performance is not necessarily a guide to future performance. The value of investments and the income from them may fall as well as rise and be affected by changes in exchange rates, and you may not get back the amount of your original investment. Blue Whale Capital LLP does not offer investment advice or make any recommendations regarding the suitability of its products. All data is sourced from Blue Whale Capital LLP unless otherwise noted. Market cap data sourced from Bloomberg.

Please note that the Top 10 is provided for information only and the views we express on holdings do not constitute Investment Recommendations and must not be viewed as such. The sectors stated are Blue Whale's proprietary classifications which may differ from industry classifications referred to on the Factsheet.

**Company:** Mastercard  
**Sector:** Financial Services  
**Initial Investment:** Oct-17  
**Company Size:** £233bn

### Enabling half of all card transactions globally? Priceless.

Mastercard is a high quality business benefitting from the structural shift of payments away from cash to mobile, online and contactless transactions. At its core, Mastercard runs BankNet, a global payment network connecting major banks for verifying and processing card payments. Mastercard is able to process hundreds of millions of transactions per day due to its superior technology. Looking ahead, Mastercard is seeking to build on its successes in consumer payments to business-to-business transactions (much of which is still made manually by cash or cheque) and we are confident in their ability to navigate and execute on this multi-decade opportunity.

**Company:** Microsoft  
**Sector:** Technology  
**Initial Investment:** Sep-17  
**Company Size:** £1,871bn

### Powering businesses and home computing around the world is not enough for the world's largest software company

Microsoft's products; Windows, Office, server operating systems and developer tools, are part of the foundation of almost every enterprise. But history is littered with examples of companies in such enviable positions that abuse their power over customers and fail to adapt to a changing world. We believe Microsoft is a rare exception.

Since taking over as CEO in 2014, Satya Nadella has reinvigorated Microsoft by pursuing a more 'open' strategy (Office 365 works on Apple iPhones - unthinkable previously), overhauling internal culture to attract the best talent and focusing attention firmly on the future of technology (Microsoft is one of the top contributors to open source software and artificial intelligence research).

**Company:** Nvidia  
**Sector:** Technology  
**Initial Investment:** Jun-21  
**Company Size:** £616bn

### Accelerating the evolution of artificial intelligence with silicon chips that power the next phase of computing

You may not have heard of Nvidia but chances are, you're already a regular user of one of the many services their silicon chips enable, including video recommendations on TikTok, grammar checks in Word online, and augmented-reality shopping experiences on Facebook.

Nvidia's premium processors were initially used for graphics-heavy computer games but their ability to accelerate the speed of data processing was quickly discovered by the major cloud service providers (Amazon Web Services, Google Cloud Platform, Microsoft Azure) and has now become the gold standard for running apps and processes in the Cloud.

We believe Nvidia's opportunity lies at the confluence of three major secular trends over the next decade – artificial intelligence, augmented reality and 5G – all three of which drive increasingly higher demands on processing power, something Nvidia is well-positioned to supply.

**Company:** Sartorius  
**Sector:** Healthcare  
**Initial Investment:** Jun-21  
**Company Size:** £37bn

### Driving the transformation of medicine production from brute chemical processes to organic biologics

Sartorius represents one of the only publicly available pure-play investment opportunities in the growing bioprocessing industry. The bioprocessing industry is attractive because the business model and regulatory approval requirements mean that 75% of Sartorius's revenue is repeatable consumables revenue that is locked-in for the lifetime of the biologic – a type of medicine that is made not from chemicals but from organic matter. Moreover, Sartorius is benefitting from two secular shifts; the increasing prevalence of biologics (currently 30% of drugs sold and growing) and a shift from stainless steel technologies to single-use technologies. The combination of these two factors means that Sartorius has a long and sustainable growth runway.

**Company:** Veeva  
**Sector:** Healthcare  
**Initial Investment:** Jun-18  
**Company Size:** £33bn

### Accelerating the discovery and availability of lifesaving drugs

Veeva develops software specifically for the life-sciences industry and was founded in 2007. A relentless focus on innovation and delighting its customers led Veeva to become the largest software vendor to the life-sciences industry just 10 years later.

Veeva has a dominant market share in pharmaceutical CRM software. We are optimistic about significant growth in the future as Veeva leverages its customer relationships, technology platform (Veeva Vault) and focus on innovation and customer surplus into many other niches within the life-sciences industry. And there are many; from the software used to manage vast amounts of data generated by clinical trials, to the software for a global pharmaceutical company to manage compliance with myriad regulations in the hundreds of countries in which it operates. Longer term, Veeva also has its sights on other industries that share some similar characteristics such as chemicals and cosmetics.

#### Marketing Communication

## IMPORTANT NOTICE - REGULATORY INFORMATION AND RISK WARNINGS

This Marketing Communication is issued by Blue Whale Capital LLP ("Blue Whale") which is authorised and regulated by the UK Financial Conduct Authority. Please refer to the Prospectus and KIID before making any investment decisions: [www.bluewhale.co.uk/global/eu](http://www.bluewhale.co.uk/global/eu)

**The Blue Whale Investment Funds ICAV – Blue Whale Growth Fund (the "Fund") is an Irish authorised UCITS open-ended investment company. It is a recognised scheme under Section 264 of the UK Financial Services & Markets Act 2000 ("FSMA"). The Fund is operated by Link Fund Manager Solutions (Ireland) Ltd ("LFMSI") and Blue Whale is the Investment Manager and Distributor. LFMSI as UCITS Man Co has the right to terminate the agreements made for marketing of funds in accordance with the UCITS Directive.**

The document may include or may refer to documents that include forward-looking statements that are based upon our current opinions, expectations and projections. We undertake no obligation to update or revise any forward-looking statements. Actual results could differ materially from those anticipated in the forward-looking statements. Please note that the views we express on companies do not constitute Investment Recommendations and must not be viewed as such.

There are significant risks associated with investment in the Fund which is intended for investors who understand and can accept the risks associated with such an investment. The Fund is a concentrated equity fund. The portfolio may have a significant industry, sector or geographical focus and may be more susceptible to changes in value than a more diversified fund. You must be aware that unlike holding cash in a bank account, your capital is at risk of market movement and you should not assume that your investment will be profitable. Equity investment should be seen as a long-term investment normally of at least 5 years. The value of your investment may be volatile and be subject to sudden and substantial falls, so you could get back less than you invested, especially in the shorter term.

### **Past performance is not a guide to future performance.**

Income from investments may fluctuate. Changes in rates of exchange may have an adverse effect on the value, price or income of investments. Fund charges may be applied in whole or part to capital, which may result in capital erosion. The ICAV directors may apply a dilution adjustment as detailed in the Prospectus. You should be aware of the additional risks associated with investment in emerging and developing markets.

The foregoing list of risk factors is not complete and reference should be made to the Fund's Prospectus and Supplement.

The Fund is not registered under the Securities Act 1933 or the Investment Company Act 1940 of the United States of America ("USA") and is therefore not for distribution to any US persons or to any other person in the USA. The Fund is not registered with the Hong Kong Securities & Futures Commission and accordingly the distribution of this document is restricted. This document is not aimed at persons who are residents of any country where the Fund is not registered or approved for marketing and/or sale or in which the dissemination of information on the Fund or the services of Blue Whale is not permitted.

### **Complaints and compensation**

Investors may complain to the ICAV, to LFMSI or to Blue Whale, however, please note that you are unlikely to be eligible to complain to the UK Financial Ombudsman Service or to make a claim under the UK Financial Services Compensation Scheme. The following link provides a full list of shareholders' rights: [https://www.linkgroup.eu/media/1617/20210730-shareholder-rights-policy\\_final.pdf](https://www.linkgroup.eu/media/1617/20210730-shareholder-rights-policy_final.pdf)

### **Advice**

If you are unsure of the suitability of the Fund to your needs or if you feel that you do not fully understand the risks of investing in it, you should contact a reputable professional financial adviser.

### **Taxation**

Taxation will depend on individual financial circumstances and the country of residence. You should consider obtaining professional advice on taxation where appropriate before proceeding with any investment.

No part of this document may be copied, reproduced or distributed to any other person without the prior written consent of Blue Whale.
