RISKS OF INVESTING

You must be aware that unlike holding cash in a bank account, your capital is at risk of market movement, and you should not assume that your investment will be profitable. Equity investment should be seen as a long-term investment normally of at least 5 years. The value of your investment can fall as well as rise so you could get back less than you invested, especially in the shorter term. There are significant downside risks associated with investment in an equity fund including:

1. Global economic conditions: inflation, deflation, slowing growth, recession and rising interest rates
2. Political instability, war, sanctions
3. Concentration risk in companies and investment sectors
4. Poor investment decisions

Investment in the Fund is intended for investors who understand and can accept the risks associated with such an investment including potentially a substantial or complete loss of their investment.

WARNINGS

Past performance is not a guide to future performance.

The value of investments and any income derived from them can go down as well as up and the value of your investment may be volatile and be subject to sudden and substantial falls.

A concentrated fund has higher exposure to fewer stocks and often to fewer sectors and thus elevated risk compared to a diversified fund.

Investment in a Fund with exposure to emerging markets involves additional risk factors and special considerations which may not be typically associated with investing in more developed markets.

Income from investments may fluctuate.

Changes in rates of exchange may have an adverse effect on the value, price or income of investments.

Fund charges may be applied in whole or part to capital, which may result in capital erosion.

The Authorised Corporate Director may apply a dilution adjustment as detailed in the Prospectus.

The foregoing list of risk factors is not complete, and reference must be made to the Fund's Prospectus, KIID and application form before investing; available in English only at <https://bluewhale.co.uk/documents>

Investors own an interest in the Fund but do not have any beneficial interest in the underlying assets of the Fund.
