WHAT WE DO

- Aim to buy and hold high quality businesses at an attractive price.
- In-house research underpinning a high-conviction portfolio of 25-35 stocks.
- Significant resources dedicated to internal financial modelling and proprietary valuation metrics.
- Focus on a genuinely active, valuation-driven approach.

Investment Objective

The Investment Objective of the Fund is to achieve capital growth over any five year period, after all costs and charges have been taken.

Investment Strategy

In selecting investments for the portfolio, the Investment Manager will identify companies which, based on its analysis, meet the following criteria:

- have the ability to grow and improve profitability over the long term;
- have a current valuation that is attractive relative to their future growth and profitability.

The Investment Manager will select companies from a broad range of geographies and sectors with no particular sector or style bias.

Risk Management

- UK UCITS-compliant.
- Assessment of company specific risk factors, including those related to ESG, that might materially impact the business's sustainable return on investment. Blue Whale is a signatory to UN Principles for Responsible Investment (UNPRI).

BLUE WHALE COMMITMENT

- Peter Hargreaves (Chairman) – in excess of £150m across the Blue Whale Growth strategy
- Stephen Yiu (CEO & CIO) – only invests in WS Blue Whale Growth Fund (holds no other fund)
- Blue Whale Capital - follow our annual investment of £120,000 in WS Blue Whale Growth Fund
- WS Blue Whale Growth Fund Fee Rebate Scheme

DEEPSEEK: A GAME-CHANGER FOR GENERATIVE AI

by Stephen Yiu, published 29th January

What happened?

DeepSeek, a Chinese company specialising in generative AI applications, has roared into view and soared in popularity on app stores thanks to its ability to deliver ChatGPT-level performance at a fraction of the development cost. Reports suggest DeepSeek has achieved this breakthrough by training its AI model on significantly fewer and less-powerful GPUs compared to alternatives like OpenAI's ChatGPT.

This development could have profound implications for the AI industry and associated sectors.

Why does this matter?

The potential impact of DeepSeek's innovation is far-reaching. Historically, AI development has been a high cost activity - both for developers and end-users - driven by the substantial computational power and infrastructure required. DeepSeek has developed a new approach with more efficient compute and less hardware, which shows that AI models can be trained more cost-effectively, potentially transforming the economic dynamics of the industry.

Market fallout

News of DeepSeek's efficiency triggered a sharp market reaction. Shares of companies involved in GPU manufacturing and AI hardware - including cooling systems used in data centres - fell sharply on Monday. Investors interpreted the development as a sign of declining demand for these components.

Taking a step back

While the market's reaction was dramatic, we believe this development is, in fact, a net positive for the AI sector.

Why DeepSeek's breakthrough is good news for AI

1. Lower costs and barriers to entry:

AI, once the preserve of mega-cap tech giants with deep pockets like Microsoft, OpenAI, Adobe, and Meta, is now becoming more accessible. Reduced hardware and energy demands mean smaller players can enter the space, fostering competition and accelerating innovation and demand.

2. Improved energy efficiency:

AI infrastructure has faced criticism for its significant energy consumption. Some tech giants have invested in alternative energy solutions, even building their own small nuclear reactors to meet future demand. DeepSeek's breakthrough goes some way to ease these concerns by cutting or pushing back the increases in energy demand, reducing the environmental footprint of AI.

3. A foundation for AI 2.0:

The rise of companies like DeepSeek could expedite the next phase of AI innovation. While the first wave of AI focused on applications like code generation, copywriting, and image creation, lower costs and increased competition may pave the way for entirely new use cases to emerge in a second wave.

4. Motivating the big players:

Established players such as Meta, Microsoft, and Alphabet are unlikely to scale back their AI ambitions. Instead, they're likely to seize on these efficiencies themselves to expand further. Notably, Meta recently announced a 20% increase in capital expenditure, much of which is earmarked for AI. This could be considered an arms race, and if you aren't moving forwards, you're moving backwards. The emergence of a new international competitor like DeepSeek will only heighten the urgency for US tech giants to maintain their leadership.

What's next?

It's important to approach DeepSeek's claims with a little scepticism, especially given the timing and the context of a Chinese app rising rapidly in US download rankings. However, if the figures are accurate, this development marks an exciting milestone for the future of AI.

Rather than damaging the industry, DeepSeek has injected it with yet more innovation and urgency, making AI more cost-effective, efficient, and scalable. These are likely to lead to wider adoption, setting the stage for a sustainable and dynamic AI ecosystem.

My perspective

I'm closely monitoring these developments. While market reactions can be outsized or misaligned with long-term implications, I view this as a positive shift for the AI landscape.

Our portfolio is well-positioned to benefit from these idiosyncratic moves. Just as Microsoft and Amazon rebounded and thrived after the initial Covid-19 market sell-off, I think the long-term effects of DeepSeek's advancements will unlock significant opportunities.

To demonstrate my confidence, I've begun to initiate the first round of company investment into our own Fund in 2025. This aligns with my belief in the short-term nature of current market volatility and the immense long-term potential of a more efficient and accessible AI ecosystem. Some investors have taken fright this week. I am instead energised by the latest development. It won't be the last.

This communication is issued by Blue Whale Capital LLP which is authorised and regulated by the Financial Conduct Authority. Your capital is at risk. If you cannot afford the potential risk of a substantial loss, you should not invest. Equity investment should be viewed as a long-term investment. Past performance is not a guide to future performance. The value of investments may fall as well as rise and you may not get back the amount of your original investment. Prospective investors should study the Fund's Prospectus, KIID and application form which together provide a complete list of risk factors. Blue Whale does not give investment advice. If you are unsure if the Fund is suitable for you, you should contact a financial adviser. Views we express on companies do not constitute Investment Recommendations and must not be viewed as such.

IMPORTANT NOTICE - REGULATORY INFORMATION AND RISK WARNINGS

This document is issued by Blue Whale Capital LLP ("Blue Whale") which is authorised and regulated by the UK Financial Conduct Authority.

If you are unsure of the suitability of the Fund to your needs or if you feel that you do not fully understand the risks of investing in it, you should contact a reputable professional financial adviser.

The document does not constitute an offer by Blue Whale to enter into any contract/agreement. The contents are aimed at all categories of client including Eligible counterparties, Professional clients and Retail clients. As the Fund is a concentrated equity fund with international exposure, Blue Whale's preference is that less experienced Retail clients gain exposure to it through the professional advice channel (Blue Whale does not advise retail investors itself) or the discretionary management channel. The Fund (as a UCITS and hence non-complex) is available to retail investors on an execution-only basis. Blue Whale believes that whilst better suited to a more experienced audience, the Fund represents a suitable investment for those new to equity investing. You must be aware that unlike holding cash in a bank account, your capital is at risk of market movement and you should not assume that your investment will be profitable. Equity investment should be seen as a long term investment normally of at least 5 years. The value of your investment can fall as well as rise so you could get back less than you invested, especially in the shorter term.

The contents of this document are based upon sources of information believed to be reliable, however, save to the extent required by applicable law or regulations, no guarantee, warranty or representation (express or implied) is given as to its accuracy or completeness and, Blue Whale, its members, officers and employees do not accept any liability or responsibility in respect of the information or any views expressed herein. All data is sourced from Blue Whale unless otherwise stated.

The document may include or may refer to documents that include forward-looking statements that are based upon our current opinions, expectations and projections. We undertake no obligation to update or revise any forward-looking statements. Actual results could differ materially from those anticipated in the forward-looking statements. Please note that the views we express on companies do not constitute Investment Recommendations and must not be viewed as such.

There are significant risks associated with investment in the Fund referred to in the document. Investment in the Fund is intended for investors who understand and can accept the risks associated with such an investment including potentially a substantial or complete loss of their investment. Past performance is not a guide to future performance.

The value of investments and any income derived from them can go down as well as up and the value of your investment may be volatile and be subject to sudden and substantial falls.

Investment in a Fund with exposure to emerging markets involves risk factors and special considerations which may not be typically associated with investing in more developed markets. Political or economic change and instability may be more likely to occur and have a greater effect on the economies and markets of emerging countries. Adverse government policies, taxation, restrictions on foreign investment and on currency convertibility and repatriation, currency fluctuations and other developments in the laws and regulations of emerging countries in which investment may be made, including expropriation, nationalisation or other confiscation could result in loss to the Fund.

Income from investments may fluctuate. Changes in rates of exchange may have an adverse effect on the value, price or income of investments. Fund charges may be applied in whole or part to capital, which may result in capital erosion. The Authorised Corporate Director may apply a dilution adjustment as detailed in the Prospectus. The Fund is not traded on an exchange or recognised market.

The foregoing list of risk factors is not complete and reference should be made to the Fund's Prospectus, KIID and application form.
